

An invitation letter for Scientific and Professional Conference

„MODELS OF ORGANIZATION AND IMPLEMENTATION OF STUDENT PRACTICAL TRAINING AND THEIR APPLICABILITY IN HIGHER EDUCATION“

Dear Colleagues,

It is our honour and pleasure to invite you to the international conference “Models of Organization and Implementation of Student Practical Training and Their Applicability in Higher Education” organized by the University College of Inspection and Personnel Management Split, the University of Applied Sciences Baltazar Zaprešić, and the Adriatic University Bar. The Conference is scheduled for 30-31 August 2019 in Split. The purpose of the Conference is the development, promotion and implementation of student practical training in higher education.

You are kindly invited to present your current research and become part of endeavour to transform and innovate today's practical training in higher education.

Deadline for application and submission of abstracts is due by 20 June 2019.

Deadline for submission of full papers is due by 20 July 2019.

ABOUT THE CONFERENCE

Goals and tasks

- analysis of models and organization of student practical training in higher education
- promotion of resolving challenges of practical training through an interdisciplinary approach
- inauguration of new models and findings of student practical training
- connection and exchange of experiences
- encouraging cooperation between scientists / researchers and the economic community

A range of modern reformation tendencies affects the entire education system, the area of higher education in particular. On the wave of the great innovations that have been affecting the system of higher education on the European continent, which are based on a new quality of education oriented towards exploration of the future, encouraging competitiveness, diversity, decentralization, flexibility and mobility of all participants, there is the unique opportunity opening and aiming to remove and discard all the misunderstandings and confusion that had

made the existing system of higher education ineffective, inefficient and unprofitable. The higher education institutions strive to organize work in accordance with the new principles, which does not only involve the new role of lecturers and students, but also includes a whole new different approach to the organization and implementation of the teaching process. It is fundamental for students to develop the ability to integrate theoretical knowledge and to transform and apply it in a practical context. The reflective practice itself should develop students' abilities for independent observation, decision-making, continuous research and learning, as well as collaboration and communication with others. The new approaches to studies through an attractive, innovative, interdisciplinary and unique program, and through the synergy of professional and entrepreneurial spirit, strives to respond to the needs of a dynamic labour market, to contribute to the strengthening of the education field, which must be the foundation of the modern democratic knowledge society and its development, and it also has to educate professional, independent, responsible and highly motivated professionals who will contribute to the development of science and participate in the further development of higher education.

The purpose of practical training is to monitor tasks and workload, solve problems, assist workers in resolving labour situations and moral and ethical dilemmas, and promote staff development.

- the significance gained by student practical training in the immediate present, the use of new technologies, innovation and the speed of changes;
- implementation of modern technologies in the field of professional practice, building sustainable relationships and a better understanding of student needs;
- discovering new educational opportunities using innovations and technology through practical work;
- new trends brought about by digitization in the process of acquiring practical knowledge and learning;
- the role of practical training on the development of professional knowledge through innovation.

Innovation of Practical Training Program is based on:

- Transparency - accepting the global trend of transparency by providing students with more information in order to help them gain a full insight into the process of their future occupation.
- Risk-Based Approach - development of new tools for risk assessment for facilities and activities that students learn.
- Data integrity - solving the emerging problem of data integrity by strengthening student training to detect data integrity issues and collaborate with regulatory partners in order to comply with control access functions.

Possible topics for the Conference - orientation list:

- Quality Management System in the Economy
- Industry Waste Management
- Maintenance of Technical Systems
- Marine Waste Management
- Standards of Quality Control
- New Models for Organization and Implementation of Student Practical Training
- Preparation and Implementation of Activities Within the Administrative Work
- Research and Analysis of Documentation Related to the Institution of Student Practical Training
- Erasmus+ and Student Practical Training

- Practical Training Opportunities
- Practical Training Organization
- Practical Training Abroad
- Validation of Practical Training
- Practical Training as a Compulsory Part of the Teaching Process
- Practical Training Related to Final Paper Writing
- Student Practical Training and Private Sector Initiatives

Registration fee per accepted paper: €50 in HRK equivalent.

**The fee includes the book of abstracts (1 copy) and a certificate of participation at the Conference*

Please apply for participation and submit your abstract here. Authors whose paper is in English should also submit their abstract in English here.

Name and surname (for multiple authors separate by a comma):

Department / Position: _____

Organization / Company: _____

Teaching grade, associate grade or academic title: _____

Working place: _____

OIB/VAT (Company ID): _____

Address: _____

City: _____

Country: _____

Email: _____

Telephone: _____

Fax: _____

Mobile phone: _____

Paper title: _____

Abstract (150 words min.)

Dordje Nadrljanski, PhD
